

## 40 Series Track Machines Service

### Protect Your Investment With Quality Service Parts from Geoprobe Systems®

Keeping your Geoprobe® machine in excellent operating condition is important to your company and keeps your investment paying dividends. Proper machine maintenance is also a key to operator safety since poorly maintained machines can be a work hazard for those running your machine or for others in the work area. It can be expensive and inconvenient if your machine has problems at the job site due to preventable maintenance issues.

### Geoprobe models: 8040DT, 8140DT, 8140LS, 8140LC
